About Me

I'm a designer who builds, with about five years across product, brand and the web. These days I'm deep in AI, building small tools and workflows, following my curiosity and shipping what I learn.

Experience

Inner Circle / First Dollar · Creative Generalist

Apr 2026–Present

- Shipped the Inner Circle website and worked with Base India on short design sprints.
- Owned Build Something Wonderful, an OpenAI Fellowship, across branding, website and launch; the launch post reached ~400K impressions on Twitter/X.
- Redesigned and shipped the First Dollar web product; designed and built a new mobile app direction.
- Led newspaper and editorial design for 100 FT Times: a 60-copy test run, with ~200K social impressions at launch and strong reader feedback.

Bento.fun · Product Designer

Oct 2025–Mar 2026

- Led the brand rework and website redesign, defining a new visual identity and positioning.
- Led product design and core flows for the first alpha MVP; supported launch video and social creative, helping grow a Telegram alpha community of 100+ users.

Gloww.design · Product Designer

Feb–Oct 2025

- Designed products, landing pages and brand assets for Web3 startups including FereAI, BASE, Velar and Proxy.
- Designed and launched Farcaster mini apps: Emerge, Packripr, Hi/Lo, Facebreaker and Farfield.

Farcaster Builders India · Visual Designer

Jul 2024–Feb 2025

- Designed community graphics and first merch; supported FBI Africa's launch and Base Fellowship design.

IMURS · Product Designer

Aug 2023–Jul 2024

- Developed the initial website and designed MVP UI/UX, packaging and social creative.

Illustrake · UI Designer

Mar 2021–Sep 2022

- Designed D2C websites, identities and ad creative; led a B2B brand-building SaaS platform's UI/UX from concept to MVP.

Selected Work

MYOB — Make Your Own Breakfast

Designed and built a cooking platform with 40K+ website visitors, approximately 50–100 daily concurrent users and ~300K launch impressions on social media. I also experiment with AI-powered product experiences and build internal AI tools and workflows.
